

\$450 LAB SERVICE (Shipped Items Only)

This fee includes:

- 2 hour examination by a licensed engineer.
- Report of Findings with Photos

If additional testing or a more detailed report is warranted, our standard rates apply. Storage fees are dependent on size.

Professional Services will be performed in a fair, honest and objective fashion consistent with industry standards. All opinions rendered will be based on the facts of the specific assignment.

INSTRUCTIONS

Please see the lab instructions and evidence form attached. Dial 888-873-6752 or email info@usforensic.com if you have questions.

U.S. Forensic
Engineering • Inspection • Failure Analysis

Engineering Laboratory Services

U.S. Forensic offers a “mail-in” lab service providing clients with a convenient and cost effective method of evaluating the cause and origin of a component or appliance failure. We can assist in determining subrogation potential. Within our U.S. Forensic lab, our engineers conduct testing to identify whether or not the component in question has contributed to the failure, loss, or accident.

Items are shipped directly to our laboratory for comprehensive evaluation. Once the analysis is complete, we provide a report of findings with photographs.

U.S. Forensic offers fixed fee pricing for mail-in component services in order to make it easy and cost effective for clients. Items evaluated may include, but are not limited to:

- Plumbing Components
- Water Filters
- Small Appliances
- Electrical Components

Engineering Laboratory Instructions

1. Before disconnecting or removing the component/appliance, please photograph from different angles include photographs of the connections. When removing evidence, be sure not to damage the area that is to be examined.
2. Please email photographs or include a hard copy of photographs when shipping. To email, send to info@usforensic.com and reference the claim number, insured name, and description of the component.
3. If possible, place the component in a plastic bag and pack the component appropriately to prevent damage during shipping.
4. Complete the U.S. Forensic Laboratory Form and place a copy of the form with the component/appliance that you are shipping.
5. Ship to:

U.S. Forensic
Attn: Lab Services
25852 Highway 43
Picayune, MS 39466
6. Please record any tracking numbers associated with the shipment.
7. Any questions can be submitted to info@usforensic.com or 888-873-6752.
